VAN GUARD

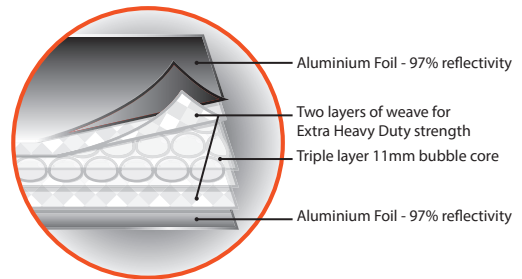

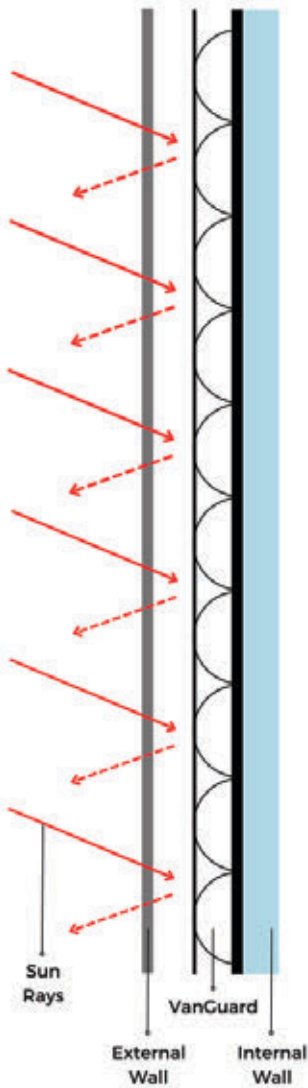

VanGuard is the newest and most fit-for-purpose caravan insulation developed by one of Australia's leading insulation manufacturers!

- ✔ Fire rated as low flammability index AS 1530.2 ≤ 5
- ✔ Extra heavy-duty rating 10.5kN/m
- ✔ 1.35m x 22.25m compact roll format takes up less space
- ✔ Provides noise dampening qualities
- ✔ 15-year warranty

Attached to the inner cavity wall, VanGuard's flexible high profile allows it to pass underneath the wiring, providing full insulation coverage across the caravan and reduces internal condensation across the wiring lines.

The 100% insulation coverage in the van not only provides a high insulation value, but also reduces the load on solar batteries and improves van comfort in both hot and cold climates.

VanGuard is a two in one product with the 97% reflective surface acting as a radiant barrier that deflects heat from the sun away from the van, whilst the layer of still air trapped inside the bubble provides further insulation from the cold.
